

Unleashing cooking from galleys

Introducing
Halton Marine
MobiChef

Halton

Getting closer to customers

Halton Marine MobiChef with integrated exhaust air recycling unit is a totally autonomous mobile cooking station for electric appliances.

Unleashed from any ventilation ductwork, Halton Marine MobiChef brings the cooking closer to customers and where ever it is needed.

Move cooking amongst your guest, not grease and odours!

Halton Marine's MobiChef is equipped with the Capture Jet™ technology that "locks" the upper part and the side of the units by creating air curtain capturing efficiently smoke released by the cooking appliances and steering it towards the advanced and integrated recycling unit.

1. Halton's KSA cyclonic filters and mesh filters
2. Additional disposable pre-filter (EU5, F5 class)
3. ESP filter
4. Absolute filters
5. and 6. Carbon and chemical pellets

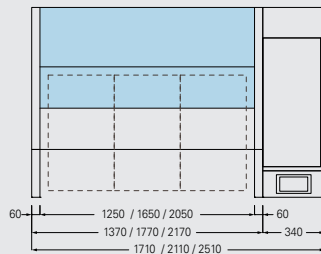

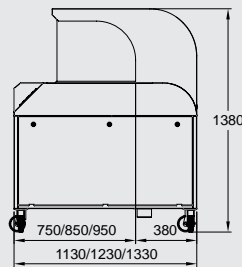

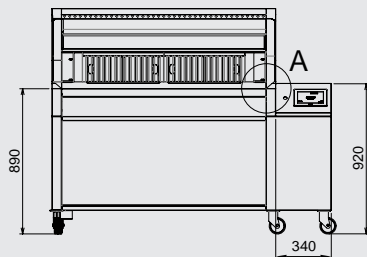

Halton's control platform are easy to use

The user interface has been designed to manage advanced technologies by use of clear visuals which allows easy control of the main functions. The remaining life time of the filters are clearly displayed so that the maintenance operations can be easily planned.

Halton MobiChef controls ensure that you are always working at the correct airflow. The speed of the fan is adjusted automatically to compensate for filter pressure losses as they become dirty. The exhaust airflow is then kept constant, ensuring that the capture efficiency remains at its maximum level whatever the state of the filters.

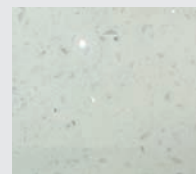

Halton Marine MobiChef dimensions. Construction follows USPHS guidelines.

Integrated powerful LED spots (warm white)

Quartz stone table top
(different materials
available)

Halton Marine MobiChef is compatible with electric appliances. Appliances are not included in delivery.
